

CLOUD GATEWAY PORTAL

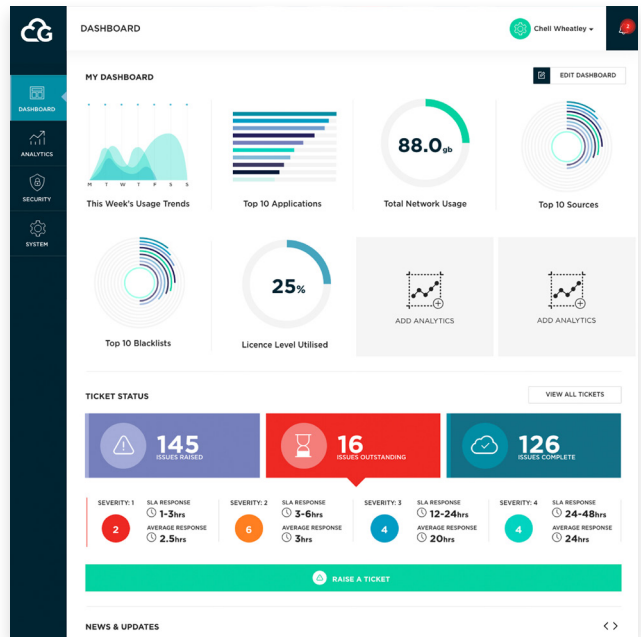

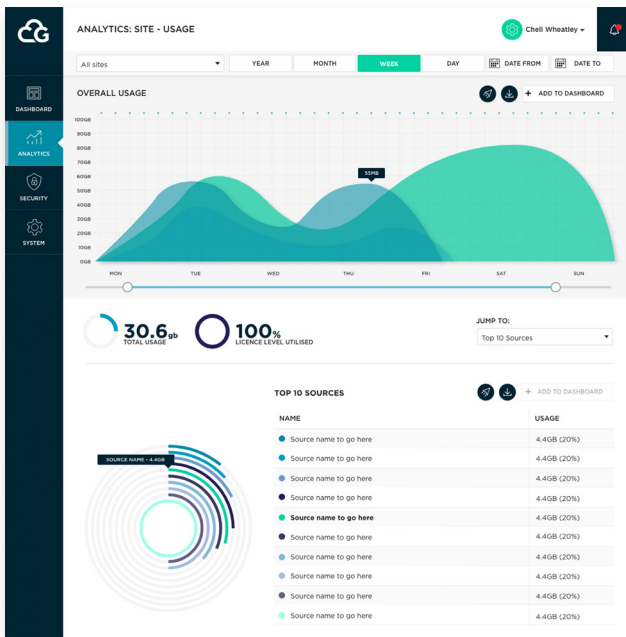

Intelligent Network and Security insights in real-time.

The Cloud Gateway Portal delivers real-time reporting and analytics of all network and security events. Accessible via a web interface, it's visibility at your fingertips.

With the Portal's array of tools at your disposal, you can control and keep track of your network performance as well as being alerted to security

related events. Drill down into the minute detail, filtering by traffic or application, blocked packet or protocol.

24/7 control

Control at your fingertips and always available. The Cloud Gateway Portal lets you view network traffic events and performance in real time, as well as being alerted to important network and security events.

The Portal equips IT professionals with advanced reporting and analytics, removing the need to invest in expensive, on-premise network monitoring.

Operational efficiency

The Cloud Gateway Portal provides your organisation with a record of all traffic events across your network, assisting with governance of data and aiding in your Compliance with regulations such as GDPR.

Cloud Gateway enables you to transform your network at scale and facilitate your journey to the Cloud at a pace suited to your requirements. It lets you do this safe in the knowledge that the underlying infrastructure is proactively managed and supported 24/7 by an industry leading SLA

tailored to address every eventuality. With dedicated service integration and ongoing consultancy delivered as standard, Cloud Gateway helps you design, deploy and adapt to the changing conditions of your Network, at a scale and cost efficiency aligned to your own strategic initiatives.
