

FIREWALL-AS-A-SERVICE

An advanced, single enforcement point for your entire organisation, reducing appliance sprawl and removing the need for multiple security policies.

Cloud Gateway enables you to implement a single enforcement point for your network traffic, and our modular approach to security means we can offer granularity in every facet of threat prevention. Advanced reporting gives you visibility of what

every user is doing, granting you complete control and visibility over your network. Security is an ever changing landscape. Cloud Gateway enables you to adapt effectively to those changes, providing your organisation with security flexibility and efficiency.

**LAYER 4

A single security enforcement point and policy for your entire estate.

Free yourself from the constraints and complexity of managing multiple security devices across your estate with Cloud Gateway's next-generation Firewall capabilities.

Reduced complexity and costs

- Remove the need to manage multiple security devices and security policies
- Patch management is eliminated and managed on your behalf
- Lower total cost of ownership and rapidly scale deployments at the network edge, distributed branches, cloud providers and on premise facilities
- Multi layered security approach to reduce the attack surface of intrusion or vulnerability into the network

Enhanced security, compliance and governance

- Next-generation Firewall
- Secure all Internet and Network Traffic
- Logging of all network traffic events, ingress and egress to aid in auditing and governance
- Protect your network from security breaches and Internet-borne threats such as Malware and zero day exploits
- Fully integrated Network Security

Cyber Security controls and integration

- SIEM and TVM integration
- Alignment and integration with your existing Security Operation Centre
- Information Assurance and analysis delivered through our in-house experts
- React rapidly to threats and control network vulnerabilities in a centralised fashion
- Simplify control and visibility of network deployments with consistent security policies across the network

Cloud Gateway enables you to transform your network at scale and facilitate your journey to the Cloud at a pace suited to your requirements. It lets you do this safe in the knowledge that the underlying infrastructure is proactively managed and supported 24/7 by an industry leading SLA

tailored to address every eventuality. With dedicated service integration and ongoing consultancy delivered as standard, Cloud Gateway helps you design, deploy and adapt to the changing conditions of your Network, at a scale and cost efficiency aligned to your own strategic initiatives.
