

PRISM

What is it?

Cloud Gateway PRISM is a hybrid cloud connectivity Platform-as-a-Service (PaaS) which securely and rapidly connects anything on your estate with multiple cloud service providers, the PSN, HSCN and the internet.

PRISM is an NCSC compliant, 100% cloud-built solution, helping businesses to operate cloud, hybrid cloud and multicloud environments. Deployed within days as a fully managed service, PRISM acts as a central enforcement point at the heart of your network, removing the burden and complexity associated with networking and security.

Product Features

<p>Enterprise Connect</p> <p>Enterprise Connect provides resilient, secure connectivity from each site to Cloud Gateway PRISM via IPsec VPN over the internet, or direct WAN connectivity.</p>	<p>Network and SD-VPN</p> <p>Rapidly connect existing and new WAN locations over any connection method desired, including internet, MPLS, 4G/5G, and satellite.</p>	<p>Remote Access Service</p> <p>RAS provides users with secure remote access to their company network via personal devices over the internet.</p>
<p>Security Enforcement Core</p> <p>The SEC monitors, filters and logs all traffic, providing extractable data for analytical purposes. PRISM comes with full UTM as standard.</p>	<p>Full Unified Threat Management</p> <p>Layer 4 - 7 DNS filtering/inspection IDS/IPS Application control URL filtering Antivirus Anti Malware & botnet check</p>	<p>Portal</p> <p>Intelligent network and security insights in real time, along with service and incident ticketing.</p>
<p>Cloud Connect</p> <p>Cloud Connect provides high bandwidth connectivity to the internet and cloud service providers.</p>	<p>Cloud Connect</p> <p>Fast, simple and secure access to your cloud service providers of choice.</p>	<p>Secure Web Gateway</p> <p>Fast, compliant and secure access to the internet, complete with SSL inspection/offloading and URL filtering protections.</p>
<p>Service Management</p>	<p>As a fully managed service, the entire Cloud Gateway PaaS is supported by a service model run by a specialist team of industry experts, following the new VerISM approach, backed by SLAs.</p>	

Deployment Options

Cloud Gateway is available to purchase as a bandwidth license, billed monthly. The minimum contract term is 12 months and it carries a 3 month cancellation period. PRISM is deployed within 5 working days from receipt of a valid purchase order.

Capacity is calculated as the aggregated bandwidth throughput at any time during a 24 hour period.

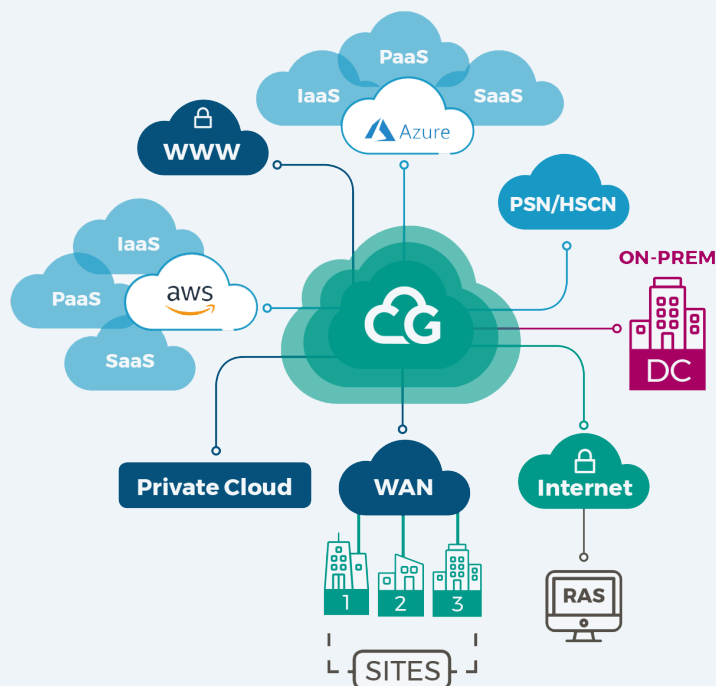

Connected Cloud Instances are defined as virtual private cloud environments supplied by one or multiple Cloud Service Providers.

Capacity	Remote Access Licences	Connected Cloud Instances (included)	Telemetry Data
100Mbps	1000	1	6 months/500GB
250Mbps	1000	1	6 months/500GB
500Mbps	1000	1	6 months/500GB
1Gbps	1000	1	12 months/1TB
2Gbps	2000	2	12 months/1TB
5Gbps	5000	3	12 months/1TB
10Gbps	10000	3	12 month/1TB

The Cloud Gateway Ecosystem

Designed to address the ever-increasing gaps between a business and the industry, Cloud Gateway PRISM provides a platform between traditional networking infrastructure and cloud services. It facilitates secure connectivity in a centralised fashion, enabling the production of reports which help ensure regulation and legislation compliance, specific to your business.

We provide secure connectivity between all your entities on your estate. We not only enable you to rapidly add, change and remove cloud service providers, connectivity providers and third parties, but also enhance your visibility protecting you from cyber threats and compliance failings. Ultimately, we give you the power to act when necessary and provide built-in flexibility to address continuous and future change.

About Cloud Gateway

Cloud Gateway offers a hybrid cloud connectivity platform (PaaS) which securely connects anything on your estate with multiple cloud service providers, the PSN, HSCN and the internet.

The Cloud Gateway platform consists of three core products: PRISM, PRISM Lite and Simply Connect, all designed to allow organisations of any size to harness the power and flexibility of hybrid cloud and multicloud but with greater control, pace and visibility. Cloud Gateway secures all your internet and network traffic, with built-in flexibility to address continuous and future change and reduce your operating costs. By centralising connectivity, organisations have a single, timely and accurate source of truth, ensuring regulation and legislation compliance and protecting you from cyber threats.
