

Health Connect

What is it?

Cloud Gateway Health Connect is a simple, software-defined networking service, designed to rapidly bring together your cloud service providers and the Health and Social Care Network (HSCN).

Initially built for the health industry in response to the COVID-19 pandemic, Health Connect is an ideal solution to securely route low bandwidth traffic between the HSCN and your connected cloud environments.

Health Connect brings together cloud and the HSCN into the same network ecosystem.

Cloud Connectivity

Health Connect is equipped with on-net connectivity to cloud fabric allowing us to establish a rapid link to any cloud service provider(s) of your choice. The solution offers private connectivity to large IaaS providers, SaaS applications, and more.

The HSCN

Health Connect not only provides connectivity to the HSCN, but we can offer guidance and support to help you identify and complete your HSCN Connection Agreement.

To deploy, Cloud Gateway will provision HSCN connectivity and trigger a connection invite within your cloud environment console. From here, you can connect the HSCN to your virtual network in the cloud.

Security

In addition to pure connectivity, Health Connect will secure your traffic via a Layer 3/4 firewall device. All traffic between your HSCN and cloud environments is routed through this firewall without exception.

Deployment and Support

Health Connect is available to purchase as a bandwidth licence, on a minimum 12 month contract, billed monthly.

The solution is available in three, low bandwidth licence options:

10Mbps

25Mbps

50Mbps

Out of the box, Health Connect includes one cloud connection, and connectivity to the HSCN. It also comes with a basic support package to ensure your service remains operational. This includes access to a customer portal where you may raise service tickets.

Telemetry data is logged and stored for 24 hours, subject to storage limits. Please see our Service Definition document for more details.

About Cloud Gateway

Cloud Gateway provides agnostic cloud-native innovation to securely connect your estate with multiple cloud service providers, the PSN, the HSCN and the internet. Harness the power of hybrid cloud and multicloud connectivity. Cloud Gateway secures your traffic, with government grade security and rapid deployment. By centralising connectivity, organisations have a timely, accurate source of truth to reduce operating costs, ensure regulation compliance and protect from cyber threats.
