

PRISM Premier

What is it?

PRISM Premier is a cloud-native hybrid cloud connectivity Platform-as-a-Service (PaaS) which securely and rapidly connects anything on your estate with multiple cloud service providers, the PSN, HSCN and the internet

PRISM is an NCSC compliant, 100% cloud-built solution. Thanks to the intelligence of our automation, PRISM can be deployed within days, removing the burden and complexity of networking and security in a timeframe that keeps up with our clients' desire to deploy hybrid and multicloud services.

Components

PRISM Premier provides your organisation with our full suite of network and security capabilities, with full control over policies and governance.

CONNECT

Site connectivity

Via SD-VPN over the internet, data centre cross connect or via third party MPLS.

Cloud connectivity

As your on-ramp to public cloud, connect to providers including AWS, Azure and Google Cloud Platform, plus hundreds of other cloud providers.

Internet connectivity

Fast, compliant and secure access to the internet.

Health & Social Care Network (HSCN) connectivity

Public Services Network (PSN) connectivity

PROTECT

Our full UTM capabilities protect your entire estate, with granular policy control over individual endpoints and subnets.

- Layer 3 / 4 Firewall
- URL Filtering
- DNS Inspection
- Application Control
- Proxy Services
- Anti Virus / Anti Malware
- Geo-IP blocking & IP reputation
- IPS / IDS
- Deep Packet Inspection (DPI)
- End-to-end encryption

INSPECT

Customer Portal

Receive your own portal to view key metrics, network status, and raise service tickets.

SOC / SIEM Log export

Offload network events to your own SOC / SIEM for further analysis.

Log Storage with API access

Gain access to historic telemetry data through export files or API.

Advanced monitoring and analytics

For in-depth traffic analysis and visibility.

Deployment Options

PRISM Premier is available to be purchased as a bandwidth license, billed each month. The minimum contract term is 12 months.

PRISM Premier is a cloud-native platform available for immediate consumption.

Connected Cloud Instances are defined as virtual private cloud environments, supplied by one or multiple Cloud Service Providers.

Bandwidth Options	Connected Cloud Instances	Connected Sites	Log Storage Length
100Mbps	5 (included as standard)	10 site connections via SD-VPN over the internet. 4 site connections via MPLS or third party network (included as standard)	30 days (subject to storage limits)
200Mbps			
300Mbps			
400Mbps			
500Mbps			
1Gbps			
2Gbps			
5Gbps			
10Gbps			

Support

PRISM Premier comes with our Premier support package as standard. As a fully managed service, the entire PRISM platform is supported by a mature service model run by a team of subject matter experts.

The Premier support package gives you the best level of service for your instance of PRISM, including a dedicated onboarding coordinator, training and 5 days of onboarding support as standard. Once live, you will benefit from the best response and effort targets available, 24/7 support for Priority 1 and 2 issues, and monthly service reviews.

The Cloud Gateway Ecosystem

Cloud Gateway is pioneering the true Agile Network, and provides businesses with both the mechanism and resource support to adopt, develop and operate cloud, hybrid cloud and multicloud environments.

From a central enforcement point, Cloud Gateway PRISM delivers secure connectivity between your organisation, multiple cloud service providers, the Health and Social Care Network (HSCN) and the internet.

About Cloud Gateway

Cloud Gateway provides unique cloud-native innovation for fully agnostic hybrid cloud and multicloud connectivity. Securely connect your estate with multiple cloud service providers, the PSN, the HSCN and the internet.

Organisations of any size can harness the power and flexibility of hybrid cloud and multicloud but with greater control, pace and visibility. Cloud Gateway secures all your internet and network traffic, with rapid deployment and government grade security. Built-in flexibility ensures continuous change is future-proofed and reduces operating costs. By centralising connectivity, organisations have a single, timely and accurate source of truth, ensuring regulation compliance and protection from cyber threats.
