# CLOUD GATEWAY

PRISM Premier

What is it?

PRISM Premier is a cloud-native hybrid cloud connectivity Platform-as-a-Service (PaaS) which securely and rapidly connects anything on your estate with multiple cloud service providers, the PSN, HSCN and the internet

PRISM is an NCSC compliant, 100% cloud-built solution. Thanks to the intelligence of our automation, PRISM can be deployed within days, removing the burden and complexity of networking and security in a timeframe that keeps up with our clients' desire to deploy hybrid and multicloud services.

Components

PRISM Premier provides your organisation with our full suite of network and security capabilities, with full control over policies and governance.

CONNECT
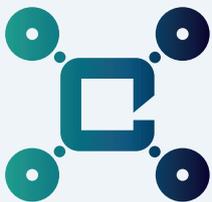

Site connectivity
Via SD-VPN over the internet, data centre cross connect or via third party MPLS.

Cloud connectivity
As your on-ramp to public cloud, connect to providers including AWS, Azure and Google Cloud Platform, plus hundreds of other cloud providers.

Internet connectivity
Fast, compliant and secure access to the internet.

Remote Access Service (RAS)
Secure remote user access to the company network over the internet

Health & Social Care Network (HSCN) and Public Services Network (PSN) connectivity

PROTECT

Our full UTM capabilities protect your entire estate, with granular policy control over individual endpoints and subnets, including:
Layer 3 / 4 Firewall
URL Filtering, DNS Inspection
Application Control, Proxy Services
Anti Virus / Anti Malware
Geo-IP blocking, IP reputation
IPS / IDS, End-to-end encryption
Deep Packet Inspection (DPI)

Web Application Firewall (WAF)
Highly sophisticated, configurable firewall that protects web applications from malicious attacks

INSPECT

Customer Portal
Receive your own portal to view key metrics, network status, and raise service tickets.

SOC / SIEM Log export
Offload network events to your own SOC / SIEM for further analysis.

Log Storage with API access
Gain access to historic telemetry data through export files or API.

Advanced monitoring and analytics
For in-depth traffic analysis and visibility.

Deployment Options

PRISM Premier is available to be purchased as a bandwidth license, billed each month. The minimum contract term is 12 months.

PRISM Premier is a cloud-native platform available for immediate consumption.

Connected Cloud Instances are defined as virtual private cloud environments, supplied by one or multiple Cloud Service Providers.

| Bandwidth Options	Connected Cloud Instances	Connected Sites	Log Storage Length
100Mbps 200Mbps 300Mbps 400Mbps 500Mbps 1Gbps 2Gbps 5Gbps 10Gbps	5 (included as standard)	10 site connections via SD-VPN over the internet. 4 site connections via MPLS or third party network (included as standard)	30 days (subject to storage limits)

Support

PRISM Premier comes with our Premier support package as standard. As a fully managed service, the entire PRISM platform is supported by a mature service model run by a team of subject matter experts.

The Premier support package gives you the best level of service for your instance of PRISM, including a dedicated onboarding coordinator, training and 5 days of onboarding support as standard. Once live, you will benefit from the best response and effort targets available, 24/7 support for Priority 1 and 2 issues, and monthly service reviews.

The Cloud Gateway Ecosystem

Cloud Gateway is pioneering the true Agile Network, and provides businesses with both the mechanism and resource support to adopt, develop and operate cloud, hybrid cloud and multicloud environments.

From a central enforcement point, Cloud Gateway PRISM delivers secure connectivity between your organisation, multiple cloud service providers, the Health and Social Care Network (HSCN) and the internet.
