

# Technology Predictions 2021

## What's going up and what's coming down?

2020 ripped up the rule book across the board but it brought with it some interesting shifts in what technology is being consumed by organisations. What will we see growing in popularity and what will be going down the priority list?

## Tech Going Up

Widespread adoption of Virtual Desktop Infrastructure (VDI)

Security vendors porting their IP for use in public cloud

Using the cloud to egress to the internet

Public Services Network (PSN) closedown

Reduction in the use of dedicated circuits

## Tech Going Down
