

# Health Connect

## Flexible HSCN Connectivity

Health Connect is a highly flexible solution which is tailored to bring together your site(s), cloud or on-premise environments with the Health & Social Care Network (HSCN). With scalable bandwidth and additional security options - and absolutely no long lead times and no installation charges - Health Connect puts the power of choice and flexibility back in your hands.

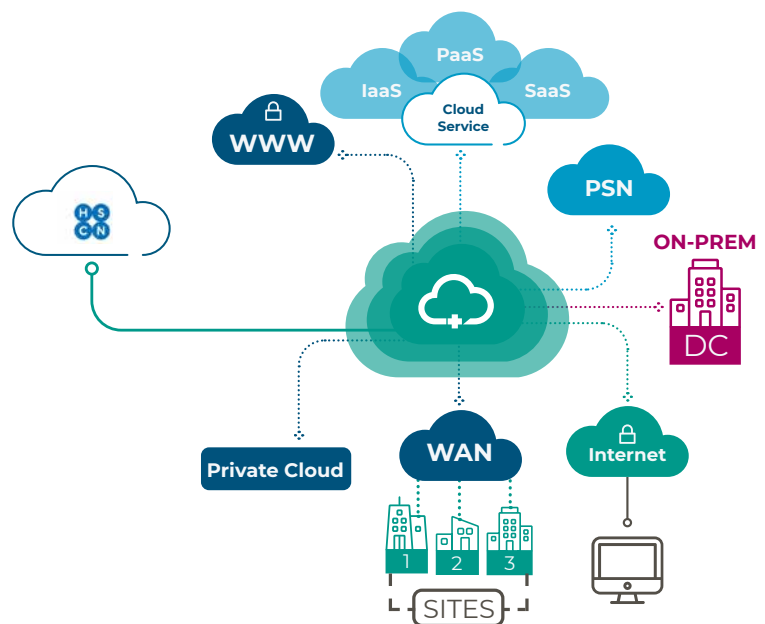

## Connectivity options to suit your needs

Whether you want simple connectivity via the internet or need a more advanced connectivity method, both of which are available with additional security options, Cloud Gateway's Health Connect platform has the solution to your specific requirements.

Connectivity can be deployed within minutes, or at a pace suitable to your business. There's no longer any need to be tied to unreasonable lead times and have to wait to get connected. Health Connect also comes with no installation charges.

Speak to the Cloud Gateway team about your specific requirements and whether you need to connect remote users.

We'll find the right connectivity method for your requirements.

## Scalable bandwidth options

10 Mbps	25 Mbps	50 Mbps	100 Mbps	200 Mbps	300 Mbps	400 Mbps	500 Mbps	1 Gbps	2 Gbps	5 Gbps	10 Gbps
---------	---------	---------	----------	----------	----------	----------	----------	--------	--------	--------	---------

## Additional security options available

Health Connect meets all of the usual CNSP obligations for security, however you also have the option of routing traffic through a Secure Enforcement Core. Depending on your needs, traffic to/from the internet, your cloud connected environments, or your connected enterprise sites can have added security capabilities. Speak to the team about your needs and we can make recommendations on the level of additional security you may need.

If you need additional security, choose from:

### Foundation Security

Layer 3/4 Firewall

OR

### Firewall-as-a-Service (FWaaS)

Layer 3/4 Firewall  
Geo-IP Blocking & IP Reputation  
Anti Virus & Anti Malware  
IPS / IDS  
Deep Packet Inspection (DPI)

AND/  
OR

### Secure Web Gateway

URL Filtering, DNS Inspection  
Application Control, Proxy Services  
Deep Packet Inspection (DPI)

AND/  
OR

### Web Application Firewall (WAF)

## Remote Access

Connect remote users from any device over the internet, with the same level of security you would expect from your enterprise site.

With remote access your essential staff can operate securely, from anywhere. Just tell us how many users you need and leave the rest to us.

## Support on your Connection Agreement

Health Connect not only provides connectivity to the HSCN, but we can offer guidance and support to help you complete your HSCN Connection Agreement.

## SIEM / SOC

With additional security, you can also choose SIEM / SOC Integration with options for log export and log storage. Speak to the team about your needs.

## Fully managed service with additional support available

Cloud Gateway's team of experts will deploy and manage Health Connect for you. From setup, to live service, we'll take care of everything; your connectivity, your security policies, and any changes you may require.

With Health Connect you'll get a portal which provides visibility of your ecosystem and utilisation and where you can raise service tickets if needed.

## About Cloud Gateway

Cloud Gateway provides flexible, cloud-native networking and security solutions to rapidly connect organisations to multiple cloud service providers, the HSCN, the PSN and the internet - delivered as a service at a pace suitable to the business.
